## Choice Of Magics Free Download [Password]

Queen Thecla puts her hands on her hips. "I'm informed that you had at least one existing relationship prior to ours."

"That's true," you say, not bothering to impugn the queen's intelligence, in both senses of the word.

"I'm not interested in playing games," Queen Thecla says. "I don't court for fun. Everything about my life is a responsibility, do you understand? You must be serious about becoming my spouse if this relationship is to continue. And that means breaking things off with any and all other suitors."

You blink and digest this for a moment, because you had no idea that things had progressed this far in the queen's mind. You suppose her true feelings got buried in all the protocols she must follow.

"I really like you too," you say, flattered.

"But are you willing to give up Vera and Sam?" the queen presses.

I agree to court the queen exclusively from now on. (truth)

"I can't. I'm in love with Vera."

"I can't. I'm in love with Sam."

## About This Game

Your magic can change the world, but at what cost? Battle dragons, skyships, and evil Inquisitors, as you protect your homeland, conquer it, or destroy it forever.

*Choice of Magics* is a 550,000-word interactive, post-apocalyptic fantasy novel by Kevin Gold, author of our best-selling game, [Choice of Robots](#). It's entirely text-based, without graphics or sound effects, and fueled by the vast, unstoppable power of your imagination.

Thousands of years ago, the ancients destroyed civilization with five schools of magic. Each spell comes at a terrible price. Glamor charms your adversaries, rotting your body from the inside. Divination reveals faraway secrets, exposing your own secrets to others. Automation gives objects the spark of life, destabilizing the climate. Vivomancy can heal or change living things, with bizarre side effects. Blast your enemies with Negation energy, forming permanent clouds of deadly fallout.

As a young scrounger of antiquities, you hope to build your ruined world anew with these rediscovered spells. Now you must decide which of these magics can transform your post-apocalyptic society, and what you'll risk to bring hope and light to your kinsmen.

- 
- Play as male, female, or non-binary; straight, gay, bi, or ace.
  - Design your own pet, hatch a baby dragon, and build your own golems.
  - Win a war, win the crown, or win your best friend's heart.
  - Transform an evil Inquisitor into a talking tortoise, out for revenge. (Eventually.)
  - Collect magic items: rings of power, an alchemy set, a “light sword” (wink, wink)
  - Romance your village's geeky mayor, a goofy swordfighter, or even the queen.
  - Help a stuffed monkey to repaint all of the murals in the Cathedral dungeon.
  - Test out the mayor's new board game.

Can you bring the world back from ruin and shape a new society? Use your magics well, and you could become as a god; use your magics poorly and destroy the world all over again.

"Qa vu...subsita...edere?" *How long are you stay here?* you manage in your broken Magisterian. You think.

Espar looks sad. "Soon."

"What do you mean?" you ask. "Will you be free, or..."

Espar shakes his head and curls up into a ball, head on his knees. He sobs softly.

You could say something to cheer up the old man.

- I reach for his hand and squeeze it to reassure him. (Requires Empathy)
- I put a hand on his back. "We'll get you out somehow." (Requires Optimism)
- I try telling him a knock-knock joke. (Requires Humor)
- I'm not very good at cheering people up. I leave him be.

You decide to practice your Automation skills. What will you create?

- I will create a sword made of light, a weapon befitting a wizard.
- I will create a sword of light for Tal.
- I will create a golem servant for myself.
- I create a crystal ball, able to aid in divining the future.
- I design a giant negative energy cannon to disintegrate the Eternal Storm.

Truly one of my favorites ever! Love, magic, action and character development, Oh and of course choices. Its all I can ask for, maybe zombies too but thats just wishful thinking.. This game is one of my favourites in recent memory, the lore of the world is plenty, the characters feel real and you form an actual bond with them, actually getting attached to them, and the whimsical magic is something that feels realistic and as if the consequences make sense (for most of them), those you are spying on learning things about you? makes sense, things you create with the power of life eventually following a path that you didn't originally intend for them, seems like it would happen irl if you had these powers, machines making the climate situation worse, global warming in a nutshell, negation magic(described in-game as the power of death) making clouds of death? a bit of a stretch but it seems pretty reasonable, one thing I dont understand though is why glamors give you rot, I guess it makes you more charismatic and likeable on the outside and your insides gain the opposite affect.

I have completed the game multiple times, (4 to be exact) and I have only gotten 2 endings that could be really described as good with each of my playthroughs taking 7-8 hours, although that may have just been me getting distracted by other things irl. all in all I really loved this game and recommend it to most people who like games in which your choices matter, and/or fantasy games, the magical parts of the game are why I like this game more than choice of robots or choice of alexadria, I did 1 full playthrough of robots and I got bored with alexandria within the first bit of dialogue, having barely reached land, I like this better because the others feel too much like real life, what with the actual history part of alexandria, and the modern day part of robots. it has better and more in-depth lore and generally a better feel than choice of robots, but I enjoyed this game so much more that its actually made me want to write a review, something that I can never remember doing for any other game. the replay value is pretty good too, what with all the different possibilities, its honestly a lot like a better version of a choose the plot book, although after the fourth replay I found myself both feeling kinda bored but a lot like I really want to play more. overall, 9/10 and I hope to see more games just like this on steam in the future.. Made bad choices and died :/ Would play again to hopefully not die.. With great powers comes great responsibilities...

The number of possible paths in this story is astonishing.

I played it six times, and six times the story was quite different.. really good little word adventure game

---

One of the best "choice of" games I've played. Definitely worth a shot.. I liked this game well enough, but...

In my opinion, there are better games than this one, and they contain the same format. I haven't seen all the outcomes yet, but in my experience, this game deals more with the church, than the magic itself. Also, several plot transitions which occurred in my playthrough were illogical.

My overall experience is positive, though. It's interesting, the choices are tough to make, a few characters were interesting etc.. Very nice :D. This game is one of my favourites in recent memory, the lore of the world is plenty, the characters feel real and you form an actual bond with them, actually getting attached to them, and the whimsical magic is something that feels realistic and as if the consequences make sense (for most of them), those you are spying on learning things about you? makes sense, things you create with the power of life eventually following a path that you didn't originally intend for them, seems like it would happen irl if you had these powers, machines making the climate situation worse, global warming in a nutshell, negation magic(described in-game as the power of death) making clouds of death? a bit of a stretch but it seems pretty reasonable, one thing I don't understand though is why glamors give you rot, I guess it makes you more charismatic and likeable on the outside and your insides gain the opposite affect.

overall, 9/10 and I hope to see more games just like this on steam in the future.. Made bad choices and died :/ Would play again to hopefully not die.. Not quite as enthralling as Choice of Robots, if only for me personally, but nevertheless another great entry in the Choice of Games lineup. My one complaint about this game is that Glamour leads to Rot. Playing entirely without Glamour, I was still subjected to the effects of the Rot, which seems to form a plot point of varying importance depending on the path you take and the choices you make.

After all is said and done with this game, I am satisfied that it was a purchase worth the cost.. You can marry the queen and use Eldritch powers to fuel industry, it's pretty fun.
