Game keeps crashing upon loading cannot play game requested a refund might buy it again when i know i can play it and mayb change my review, but for now i cannot play gets stuck on 3 bars of loading then kicks me out.. Bought it on summer sale and thought; just ignore negative reviews, what do they know about playing games. Played 20min, reviews are true, Refund. Might try to play later once the game leaves alpha stage and instructions are better (or even just preset would be nice).. ok at first had trouble with the game with food not giving water but with the updates it was good . crafting was different but easy to get use to it , carrying only 10 items at a time was strange but hey it still worked ok .. needs alot of work. DO NOT BUY. Yet. fix it and make it so you can craft better. i played for a half hour and got tired of looking for wood to build a raft and it does not tell you how to do anything. just build a raft and thats it.. Graphics look ok, but gameplay is frustrating. First thing I needed to do was "built a raft". That's it. No instruction, no tutorial (at least not a clear one). Spent minutes just running round collecting wood, with no idea of what they can be used for. If this comes with a proper tutorial, because let's face it, the interface isn't the best, then I will give it another go. I might also change my review.. Bought it on summer sale and thought; just ignore negative reviews, what do they know about playing games. Played 20min, reviews are true, Refund. Might try to play later once the game leaves alpha stage and instructions are better (or even just preset would be nice).. Graphics look ok, but gameplay is frustrating. First thing I needed to do was "built a raft". That's it. No instruction, no tutorial (at least not a clear one). Spent minutes just running round collecting wood, with no idea of what they can be used for. If this comes with a proper tutorial, because let's face it, the interface isn't the best, then I will give it another go. I might also change my review.. Picked up the game, I like survival games and supporting new developers. First part of game is ok, the extra wood is not there, had to hunt long time to make raft. Not much food to be found. Once raft was made, took forever punching W key to get across ocean. Almost starved before I got there. Once there, found 1 apple and 1 coconut, no wood, 2 branches and 3 rocks in half hour of running and starving. Not sure if there is any other way to collect resources other than run around look for them on the ground. I saved the game to reset some of my graphics display as I could only see like 5 meters in front of me for wood, food etc . Now I cannot reload that game from checkpoint, or continue. Other than this reload issue, I think the game is off to a good start, good game for those who don't have time to play 1500 hrs. I will try reloading it tomorrow and see what happens.
